Environmental Policy

We at Central Mailing Services recognise that our operations have an effect on the local, regional and global environment. As a consequence of this, the management is committed to continuous improvements in environmental performance and prevention of pollution.

Environmental regulations and laws, where applicable, are regarded as setting the minimum standards of environmental performance. We will also:

- Implement our policies through a co-ordinated environmental management system
- Conserve resources by efficient use of water, energy/electricity, paper and other resources while still providing a safe and comfortable working environment
- Minimise, or where possible eliminate, all forms of emissions and pollution
- Reduce waste by recycling wherever possible and by using recycled products and materials where they are suitable
- Work with our suppliers to encourage them to improve or develop environmentally preferable goods and services
- Through training of our staff, promote a sense of responsibility and understanding of environmental issues
- Set targets and objectives designed to improve our environmental performance
- Review our performance annually, taking positive action in any areas of non-conformance
- Comply with all environmental legal and other requirements which may arise to which we are committed
- Communicate this policy to all employees, relevant suppliers and to all customers.
